# A new web experience for organizing and sharing AI prompts

Overview

Prompt

Organize and save your ideas and results so you can access them anytime

Sharing

With just one URL, you can instantly share prompts and results with your team.

Security

Your data is designed to be completely invisible to other users.

List of Features

Authentication

Password Management for Safe Use

Management

Edit prompts and view history. Build up your own thoughts.

Tag

Organize many prompts with tags for quick searching.

Result

Save results. Store images together in the cloud.

Technical Configuration

</> Next.js — SSR and API integration enable building the UI and backend as a unified whole.

🗄 Supabase — Centrally manage authentication, databases, and storage while ensuring security through RLS

🔍 Tailwind CSS — Enables rapid development of flexible UI while preventing design breakdowns

</> TypeScript — With bug prevention and supplementation, complex app development can scale reliably.

UI/UX and Sharing

Get an overview at a glance

With the search-enabled list, you can quickly find the prompt you need.

Search by tag intuitively

Simply click a tag to intuitively narrow down your search.

Share safely and easily

Share instantly with just one URL.
